

# WHAT TO DO AFTER A CAR ACCIDENT

## Call 911 for Help

If you or anyone else has been injured, call 911 immediately to get emergency responders to the scene. Police officers will make a report which can be a valuable step for your insurance claim.

## Collect Information

Get information from anyone who has been involved in the car accident. Important info includes their name, address, phone number, driver's license number, and insurance contact & police number.

## Don't Make Admissions

Car accidents can make you want to talk and figure out what happened and what to do. We encourage you to avoid admitting fault or even alluding to this idea. It can hurt your insurance claim and might not be the truth.

## Ensure Safety

If the vehicles involved in the crash are in the way of traffic and can be moved, get them to the side of the road to avoid further damage of person or property.

## Contact A Car Accident Lawyer

One of the most important steps you can take will be to file a property damage claim and personal injury claim with the guidance of a trustworthy lawyer.
